Create multiple assignments for multiple clients with separate databases for each client.

View, share, print or email audit findings and relevant documents of the client.

Audit with a few clicks with insights at your finger-tips.

Use for auditing any IT environment – customised or standard.

Use the Power of Data Analytics to infer insights and add value.

SoftCAAT: AuditTors Dream Come True! Power of Analytics at your Fingertips.

What are the Core Functions in SoftCAAT?

SoftCAAT has a host of features that enable users to perform the complete range of simple to complex functions from audit perspective with just a few clicks thus saving enormous amount of time. SoftCAAT has most of the commonly used functions of expensive data analytics software but with a simpler user interface.

Sample listing of the core functions in SoftCAAT arranged alphabetically are given below:

- **Aging:** Displays the totals of all records that are within and beyond the aging date.
- **Analytical Review:** Displays the difference between values of two numeric columns in number and in percentage.
- **Authenticate:** Displays records after combining columns from two files in to a single file based on two conditions.
- **Classify:** Groups and totals numeric data based on the count value of each unique record in a character column.
- **Compare Files:** Compares numeric columns of two files irrespective of the sorting index to display variances in count and value of the two records.
- **Dynamic Query:** Extract records by selecting specific numeric, date and character values.
- **Exceptions:** Displays records based on up to three and/or conditions.
- **Identify Duplicates:** Displays all duplicate records in the selected column(s).
- **Identify Gaps:** Find gaps in numeric, date and characters based on intervals.
- **Join Files:** Displays records after joining the columns of two files based on a specified condition.
- **MIS:** Displays the count, total, minimum, maximum and average of records for the selected period.
- **Sampling:** Picks records based on Systematic, Random or Stratified Random sampling methods.
- **Sequence Check:** Displays missing values in a numeric sequence.
- **Scripting:** Write customised scripts that can be saved and run at the click of a button.
- **Scheduling:** Schedule scripts to run at specific times on specific days.
- **Stratify:** Group numeric, date and character data into different strata (groups).
- **Summarize:** Displays the summarized values of selected numeric columns for each distinct value based on a numeric based with/ without an index.

Transform your audit process by migrating from a single- purpose spreadsheet software to a multi-dimensional Data Analytics software

Experience the amazing power of audit technology at work using SoftCAAT.

Find answers by interrogating data. Enhance your power and become a creative problem solver who can provide solutions through Data Analytics. Use the right CAATs in audit. Use SoftCAAT!

Use SoftCAAT to save 80% of your time on each audit!

Comparison of SoftCAAT and other CAAT software

Other CAAT Software

- Expensive
- Complex
- Technology oriented
- Specialists
- Time Consuming
- Difficult to learn
- Not now
- Not for me

SoftCAAT

- Affordable
- Simple
- Technology independent
- Any professional
- Time Saving
- Easy to learn
- Right now
- Relevant for me

Data Analytics: **Mystery**
