## What are the Core Functions in eCAAT?

eCAAT has more than 175 functions that enable users to perform complex functions with just a few clicks saving enormous amount of time. eCAAT has most of the functions available in the expensive data analytics software but designed with ease of use of MS Excel. Sample listing of the core functions in eCAAT arranged alphabetically are:

- **Aging:** Displays the totals of all records that are within and beyond the aging date.
- **Analytical Review:** Displays the difference between values of two numeric columns in number and in percentage.
- **Authenticate:** Displays records after combining columns from two files in to a single file based on two conditions.
- **Classify:** Groups and totals numeric data based on the count value of each unique record in a character column.
- **Compare Files:** Compares numeric columns of two files irrespective of the sorting index to display variances in count and value of the two records.
- **Dynamic Query:** Extract records by selecting specific numeric, date and character values.
- **Exceptions:** Displays records based on up to three and/or conditions.
- **Identify Changes:** Compares two worksheets and highlights all changes or non-changes as selected and also displays list of changes, if specified.
- **Identify Duplicates:** Displays all duplicate records in the selected column(s).
- **Identify Gaps:** Find gaps in numeric, date and characters based on intervals.
- **Join Files:** Displays records after joining the columns of two files based on a specified condition.
- **MIS:** Displays the count, total, minimum, maximum and average of records for the selected period.
- **Sampling:** Picks records based on Systematic, Random or Stratified Random sampling methods.
- **Sequence Check:** Displays missing values in a numeric sequence.
- **Stratify:** Group numeric, date and character data into different strata (groups).
- **Summarize:** Displays the summarized values of selected numeric columns for each distinct value based on a numeric based with/ without an index.

**Experience the amazing power of audit technology at work using eCAAT.**

Transform your audit process by migrating from a single- purpose spreadsheet software to a multi-dimensional Data Analytics software that has more than 175 audit-centric functions which can generate results in seconds.

Standardise/Simplify your work.

## Seven Key Benefits of using CAATs/Data Analytics

**In an increasingly information intensive world, the real thought leaders are intellectuals who Infer Insights through Data Analytics to Add Value!**

eCAAT will help you to use relevant assurance standards, comply with peer review requirements and be up-to-date with CAATs.
