

### List of Auto eCAAT Ent Functions with Brief Description

No.	Panel	Menu (M)	Function (F)	Tool Tips / Brief Descriptions	Type
1	By Criteria			Performs the selected list of eCAAT functions, in succession from the selected functions of specific panel.	P
2	By Criteria	Sampling		Performs Systematic, Random, Stratified - Numeric, Date & Character, Summarized, Classified, Aging, MIS, Outliers, Pareto Analysis, ABC Analysis, ABCD Analysis and Quardrant Analysis functions, in succession as specified and displays results in workbook/worksheets.	M
3	By Criteria	Sampling	Systematic	Displays every nth record based on the interval given.	F
4	By Criteria	Sampling	Random	Display specific number of records picked at random/Top 'x' based on number/percentage.	F
5	By Criteria	Sampling	TotCount	Displays specific number of records from total count of records with option to select based on Groups.	F
6	By Criteria	Sampling	Analysis: Numeric	Displays specific number of records at random selected based on numeric analysis of specified columns.	F
7	By Criteria	Sampling	Analysis: Character	Displays specific number of records at random selected based on Character analysis of specified columns.	F
8	By Criteria	Sampling	Analysis: Statistics	Displays specific number of records at random for each of the columns as selected.	F
9	By Criteria	Sampling	Analysis: Exceptions	Displays specific number of records at random for specified list of exceptions.	F
10	By Criteria	Sampling	Analysis - Outliers	Displays specific no. of records selected at random from results of Outlier function.	F
11	By Criteria	Sampling	List of Values	Displays specific number of records at random selected based on list of specified values for selected column.	F
12	By Criteria	Sampling	Duplicates	Displays specific number of records at random for each set of results of duplicates.	F
13	By Criteria	Sampling	Stratified - Numeric	Groups numeric data into different strata based on intervals. Records from any strata can be randomly picked based on a specified number or percentage.	F
14	By Criteria	Sampling	Stratified - Date	Groups date format data into different strata based on intervals. Records from any strata can be randomly picked based on a specified number or percentage.	F
15	By Criteria	Sampling	Stratified - Character	Groups character format data into different strata based on intervals. Records from any strata can be randomly picked based on a specified number or percentage.	F

### List of Auto eCAAT Ent Functions with Brief Description

No.	Panel	Menu (M)	Function (F)	Tool Tips / Brief Descriptions	Type
16	By Criteria	Sampling	Stratified - Aging	Groups computed age difference of two date columns data into different strata based on specified intervals. Records from any strata can be randomly picked based on a specified number or percentage.	F
17	By Criteria	Sampling	Classification - Quadrants	Displays specific no. of records selected at random for four separate quadrants based on results of two numeric columns.	F
18	By Criteria	Sampling	Classification - Percentiles	Displays specific no. of records selected at random for selected percentile(s) data for two selected fields.	F
19	By Criteria	Sampling	Classification - Clusters	Displays specific no. of records selected at random for selected cluster(s) data for two selected fields.	F
20	By Criteria	Sampling	Classification - Patterns	Displays specific no. of records selected at random for selected pattern(s) data for two selected fields.	F
21	By Criteria	Sampling	Summarized	Displays specific no. of records selected at random for summarised results.	F
22	By Criteria	Sampling	Classified	Displays specific no. of records selected at random for classified results.	F
23	By Criteria	Sampling	Aging Details	Displays specific no. of records selected at random for results of aging function.	F
24	By Criteria	Sampling	MIS Details	Displays specific no. of records selected at random for results of MIS function.	F
25	By Criteria	Sampling	Classifier - Quadrant	Displays specific no. of records selected at random for four separate quadrants.	F
26	By Criteria	Sampling	Classifier - Percentile	Displays specific no. of records selected at random for selected percentile(s) data.	F
27	By Criteria	Sampling	Classifier - Cluster	Displays specific no. of records selected at random for selected cluster(s) data.	F
28	By Criteria	Sampling	Classifier - Pattern	Displays specific no. of records selected at random for selected pattern(s) data.	F
29	By Criteria	Sampling	Pareto Details	Displays specific no. of records selected at random for two separate categories as per the Pareto (80:20) rule/specific percentage.	F
30	By Criteria	Sampling	ABC Details	Displays specific number of records selected at random for three separate percentage categories as per ABC analysis.	F
31	By Criteria	Sampling	ABCD Details	Displays specific number of records selected at random for four separate percentage categories as per ABCD analysis.	F
32	By Criteria	Sampling	RSF Results	Displays specific no. of records selected at random for results generated using Relative Size Factor.	F
33	By Criteria	Sampling	MVF Results	Displays specific no. of records selected at random for results generated using Max. Variance Factor.	F
34	By Criteria	Sampling	Benford's Law	Displays specific no. of records selected at random for results of Benford Analysis.	F
